

## TECHNICAL DATA

Model	UB 30
<b>'U' BENDING MACHINE</b>	
"U" Bending Capacity	12X12mm Max. 30mm
"U" Bending Length	12/2 Fixed
Motor	3.7 KW
Hydraulic System	Full Hydraulic
Dimension	4540x1690x950

TMT bars which are mostly of 12m length are inconvenient to transport in straight lengths. Till now a lot of human labor was required to bend the bar to a "U" bend shape of 6m lengths. The process used to be time and labour consuming, thus increasing the cost. Jaypee's "U" bending machine can now make the process extremely simple making it time and cost effective.
