

The Future of Cut and Bend with Jaypee India...

JAYPEE India Limited is a one stop solution provider for construction engineering industry in India and since 2008 is providing the Automatic Stirrup Bending Machine from KRB to its end users.

Automatic Stirrup Benders can increase ones production through

its fast and easy to use bending quality. By taking the smaller bars off the cutting system it can significantly produce more tonnage. It can do cutting and Bending in a single process. Along with increasing accuracy and speed Automatic Stirrup Bending can reduce man hours, reduce labor,

reduce scrap, and increase production. One operator with a single Automatic Stirrup Bender can produce as much as three or four operators on a cutting system and Benders.

With KRB Auto Stirrup Benders, Jaypee product line has been redesigned to offer the market a solid, and cost effective alternative. Rugged American manufacturing and improved design has given KRB a reliable line of performers in the field. In addition to Automatic Stirrup Benders, Jaypee India Ltd now offers KRB's full line of automatic Benders, cutting systems and Rebar pre-fabrication equipment.
